Sir:

In response to the outstanding Office Action dated April 1, 2002, Applicants request entry and consideration of the specification amended as follows and the arguments for patentability presented herein.

IN THE CLAIMS:

Please amend claims 1-33 as follows:

8' 1. (Amended) A transmission method used in a radio system that includes at least one base station and a plurality of subscriber terminals, at least two of which transmit access bursts to one and the same base station, the access bursting activating between a subscriber terminal and a base station a connection that is established by a signal that is of a certain frequency and is sent in time slots, the method comprising:

when the subscriber terminal is commanded to send the base station a signal that employs a time slot and frequency already used by another subscriber terminal, sending the subscriber terminal a command to adjust the transmission moment of the signal so that the base station receives the transmitted signals at different moments within the same time slot.
